George,

I just wanted to make to take a minute out of my day to say Thank You for a job well done. The new Rainbird irrigation system installed by your company has performed flawlessly in its first year of operation. Also the renovations/restorations your construction team performed look like they have been a part of the golf course since its original construction. You have a terrific group of guys working for you that I wouldn't hesitate to ask to do another project for us. I was very impressed with how both crews were able to work together to schedule the construction and installations of both major projects with little disturbance to the course. The members were also impressed how efficiently the crews worked to achieve the goals of the golf course. Thanks again for meeting Sankaty Head Golf Clubs expectations.

Sincerely,

Chris Ryder, GCS
